Esmée de Looff is an Agribusiness Consultant in Pinion Advisory's Ag Production & Adoption team.

Esmée is passionate about driving resource efficiency in livestock production systems. She enjoys supporting producers to use production and financial data for more informed decision making. Esmée has experience creating tailored and intuitive tools to assist producers in making the most out of their farm data for improved decision making and insight in their business.

Esmée has experience facilitating groups and helping producers to expand their knowledge and learn new skills. She has an interest in research and development and enjoys being involved with extension to help producers find effective ways to optimize their productivity and profitability in a sustainable manner.

Esmée also has a qualification in Workplace Health and Safety and is committed to supporting producers in managing safety on farm in a practical yet compliant manner.
