Centre

Dee contributes to Pinion Advisory's Farm Business Management Team. She is also involved in industry development projects.

Involvement in a family farm, in the lower north of South Australia, provides an appreciation of farming systems and issues facing agribusiness managers.

In Pinion Advisory, Dee's role involves applying this knowledge to develop and deliver industry development projects, that add value for Pinion Advisory clients and rural industries.

Dee is also the project manager for Information Products. These products provide practical insights and information that farmers can use to help make informed decisions for their business.

Dee enjoys being involved in projects that provide practical information and solutions to agribusiness managers that result in business improvement.

Areas of expertise

- Project management
- Project design and delivery
- Human resource management
