- Accounting for Nature Environmental Accounting Course v5.0

PROFESSIONAL ASSOCIATIONS & BOARDS

- Landcare Association of SA Management Committee

Sarah is dedicated to achieving outcomes for people and the planet. She thinks holistically about systems and places partnerships at the core of everything she does. Through her work, she's delivered meaningful on-ground impact and connected available funding to robustly designed, community-led climate adaptation solutions.

With core skills in natural capital protection and restoration, building resilience in rural communities, climate adaptation and mitigation planning, designing on-ground programs for equitable access to benefits, planning and delivering convenings, supporting philanthropy to meet local needs, supporting public sector to be more flexible and future looking, and robust program management she has helped to catalyse and inspire action across reef and rural communities in the Pacific, Asia and Australia.

Areas of expertise

- Natural capital accounting
- Natural capital protection and restoration
- Event design, delivery and facilitation
- Partnership brokering
- Program design
- Network building
- Governance
- Carbon accounting & net zero transition
